

OpcDialogRequestedEventArgs

Members

Namespace: Opc.UaFx.Client

Assemblies: Opc.UaFx.Advanced.dll, Opc.UaFx.Advanced.dll

The [OpcDialogRequestedEventArgs](#) type exposes the following members.

Constructors

OpcDialogRequestedEventArgs(OpcDialogCondition)

Initializes a new instance of the [OpcDialogRequestedEventArgs](#) class using the specified [dialog](#).

C#

```
public OpcDialogRequestedEventArgs(OpcDialogCondition dialog)
```

Parameters

[dialog](#) [OpcDialogCondition](#)

The [OpcDialogCondition](#) which is requesting the dialog.

Exceptions

[ArgumentNullException](#)

The [dialog](#) is a null reference (Nothing in Visual Basic).

Properties

Dialog

Gets the data of the event which is requesting the dialog.

C#

```
public OpcDialogCondition Dialog { get; }
```

Property Value

[OpcDialogCondition](#)

The [OpcDialogCondition](#) representing the dialog event information.

SelectedResponse

Gets or sets the index of the response option selected.

C#

```
public int SelectedResponse { get; set; }
```

Property Value

Int32

The index of one of the [ResponseOptions](#) supported by the [Dialog](#) or -1 if there is no response option selected. The value -1 is the default value.
