

OpcEventReceivedEventHandler Delegate

Namespace: Opc.UaFx.Client

Assemblies: Opc.UaFx.Advanced.dll

Represents the method that will handle [EventReceived](#), [EventReceived](#) and [EventReceived](#) events.

C#

```
public delegate void OpcEventReceivedEventHandler(object sender, OpcEventReceivedEventArgs e);
```

Parameters

sender [Object](#)

The source of the event (an instance of the [OpcClient](#), [OpcSubscription](#) or [OpcMonitoredItem](#) class).

e [OpcEventReceivedEventArgs](#)

An instance of the [OpcEventReceivedEventArgs](#) class containing the event data.
