

OpcFileGetPositionMethodNode.FileGetPositionCallback Delegate

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

GetPosition is used to provide the current position of the file handle.

C#

```
[CLSCompliant(false)]  
public delegate ulong FileGetPositionCallback([OpcArgument("FileHandle", Description = "The  
file handle associated with the file its position is to be queried.")] uint fileHandle);
```

Attributes [CLSCompliantAttribute](#)

Parameters

fileHandle [UInt32](#)

A file handle indicating the access request and thus indirectly the position inside the file.

Returns

[UInt64](#)

The position of the file handle in the file. If a Read or Write is called it starts at that position.
