

OpcQueryEventsCallback Delegate

Namespace: Opc.UaFx

Assemblies: Opc.UaFx.Advanced.dll

Represents the method that will refresh / (re)evaluate any node specific conditions to determine pending / occurred events the inquirer should know about.

C#

```
public delegate void OpcQueryEventsCallback(OpcNodeContext context, OpcEventCollection events);
```

Parameters

context [OpcNodeContext](#)

The [OpcNodeContext](#) to use to query the node events.

events [OpcEventCollection](#)

The [OpcEventCollection](#) to use to store the result of the query.
